

STANDARD PRECAUTION 1 HAND HYGIENE

Infection Control Policy | Version 1_September 2021

POLICY STATEMENT

Zest Personalise Care (Zest) acknowledges its obligations under Australian law to provide a safe workplace environment by the adaptation controls to meet its obligation to minimise infection through established infection control procedures.

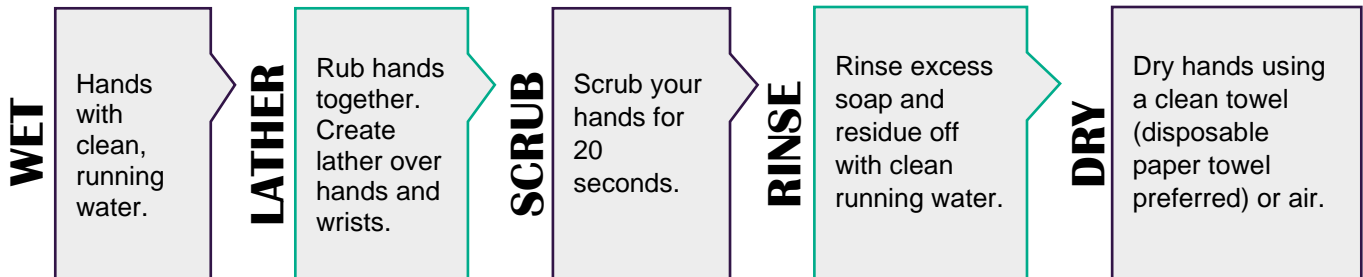

WHY IS HAND HYGIENE IMPORTANT?

Hand Hygiene is a simple first step to minimise the spread of harmful infection from one person or object to another.

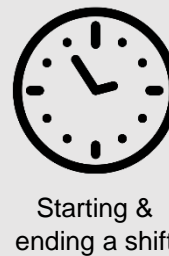

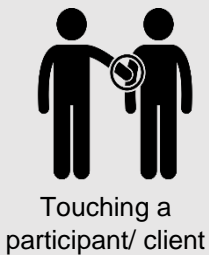

ZEST STRONGLY RECOMMENDS

All employees to encourage participants/clients to perform hand hygiene tasks.

EFFECTIVE WASHING HAND METHOD

WASH YOUR HANDS BEFORE and AFTER

WASH YOUR HANDS AFTER

HAND CARE

Hand cream and moisturisers (fragrance free or sensitive in nature) can minimise skin irritation.

IF AN ALLERGIC REACTION OCCURS?

A medical certificate stating that you are to use other methods of hand hygiene. This medical certificate must be provided to Zest and held on file also, on your persons always.
